Millennium project

- Aim: to improve Scotland's **34.** _____
- The long-term goal – to strengthen the Scottish **35.** _____
- Involved restoration of the two canals
- Problem: one canal is 35m lower than the other

The Falkirk Wheel (a mechanical lift)

- Completed in 2002
- Two large tanks are attached to the ends of an arm
- The tanks are designed to remain in a **36.** _____ position
- A boat sails into each tank
- The weight of the tanks with their contents is always **37.** _____
- Little energy is needed to rotate the arm
- Visual quality – resembles a **38.** _____

Manufacturing

- All the parts were constructed off-site
- 1,200 tonnes of **39.** _____ were used
- Joints were bolted and welded to reduce the effects of **40.** _____

oldest
central
railway
transport
economy
horizontal
equal
sculpture
steel
stress
